EXAMINER'S AMENDMENT

The following is an examiner's statement of reasons for allowance:

Claims 11-20 are allowable over the prior art of record since the cited references, taken individually or in combination, fail to particularly teach or suggest a data transmission method comprising the steps of transmitting data between communication devices in a packet oriented communication network wherein the data transmitted is time-slot oriented and segmented into (i) information segments for transmitting signaling information in first data packets, (ii) information segments for transmitting user data information in second data packets (iii) information segments for transmitting data-format specific information in third data packets. It is noted that the closest prior art, Gardner et al (US 6, 023, 474) (See Figure 3 and discussion on Figure 3), discloses a data transmission method comprising the steps of transmitting data between communication devices in a packet oriented communication network wherein the data transmitted is time-slot oriented and segmented into (i) information segments for transmitting signaling information in first data packets, (ii) information segments for transmitting user data information in second data packets.

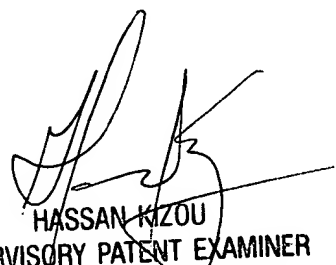

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Habte Mered whose telephone number is 571 272 6046. The examiner can normally be reached on Monday to Friday 9:30AM to 5:00PM.
